

Valentin Dumitru

Software Engineer

About me

Hello, my name is Valentin Dumitru. A soon to be software engineer. I think of myself as a very hard working and lazy individual. I can't bare a job that can be automatized. So my coping mechanism is to be as smart as I can to do the least amount of work as possible. My biggest value is that I actually love programming.

Education

Sep. 2019

Jun. 2023

4 years

Bachelor Degree Software Engineering Engineer

 Oviedo, Asturias, Spain

Studying software engineering has made me much of what I am today. It changed me for the better, it disciplined me and it made me work harder. It showed me that I can achieve great things if I work hard enough.

240 ECTS (European Credit Transfer System)

Spanish Average Grade: 7/10

Working Experience

Feb. 2023

Apr. 2023

3 months

Inetum - Outsystems Internship

 Oviedo, Asturias, Spain

This was part of the degree curriculum, to gain some experience in the business world.

My main job here was full stack developer, working with Outsystems, a low-code platform for easy development and deployment. My tasks were to create a website using Outsystems, an E-Commerce. I designed, documented and developed it from scratch. It was for practice purposes only.

2023 - now

Linux Bash Tutor Independent

 Oviedo, Asturias, Spain (Remote)

I helped a student of first year of system administration with basic/intermediate Linux Bash commands and scripts.

2021-2022
one year

Math Tutor Independent

 Oviedo, Asturias, Spain (Remote)

I helped a 4th year of high school student throughout his academic year.

2021-2022
5 months

Basic IT Tutor Independent

 Oviedo, Asturias, Spain

I did some basic IT classes for people who needed them. They were mostly oldish people who needed some actualization.
